

Barcode Printing: Unlocking Efficiency in Label Design

Introducing Barcode Printing, your comprehensive solution for effortlessly creating diverse label designs sourced directly from your SQL database. Compatible with ZPL and EPL printers, this innovative tool simplifies the label configuration process through an intuitive interface.

Key Features:

Database Integration: Seamlessly pull data from your SQL database to create dynamic label designs.

Printer Compatibility: Supports ZPL and EPL printers for versatile printing options.

User-Friendly Configuration: Easily configure label designs through a user-friendly interface, allowing for quick adjustments.

Flexible Data Fields: Incorporate up to 20 fields in your label design, with the flexibility to choose the data source from SQL views.

Transaction Data Extraction: Extract data from various transactions, including Receipt Transactions and Purchase Orders, providing enhanced versatility.

Web Service Integration: Effortlessly extract data from a web service to enhance the breadth of information at your fingertips.

Selective Printing: Preselect specific lines within transactions for printing, ensuring precision and efficiency.

Excel Imports: Streamline your workflow by importing articles directly from an Excel sheet.

Barcode Printing empowers you to streamline your label creation process, offering unparalleled flexibility and efficiency. Experience the convenience of dynamic label design with seamless integration and a user-friendly interface. Upgrade your workflow with Barcode Printing today.
