

ZPS Stock Count: Streamlining Physical Inventory Counts

Introducing Zion Stock Count, your go-to solution for conducting physical inventory counts, mirroring the functionality of Stock Count Entry in Dynamics GP. This versatile tool allows you to input data seamlessly from any device, thanks to its agnostic design.

Key Features:

Device-Agnostic Input: Enjoy the flexibility of entering data from any device, making the process convenient and accessible.

Collaborative Interaction: Multiple users can actively participate in the same stock count schedule, enhancing efficiency and accuracy.

User-Friendly Interface: With dedicated windows for both data input and administrative functions, users can effortlessly capture information, while administrators gain the ability to edit physical counts and update data in Dynamics GP.

Excel Data Export: Simplify your analysis process by exporting data to excel spreadsheet, allowing for in-depth examination and reporting.

Zion Stock Count is designed to enhance your inventory management by providing a user-friendly, collaborative, and efficient solution for conducting physical counts. Elevate your inventory processes with Zion Stock Count today.
